# COAL DRILL

## Ideal For One Person Drilling Operations

### THE DERON CD10 COAL DRILL

is a powerful, lightweight drill that is ideal for one person underground drilling operations. Weighing less than 25 lbs. and measuring 24" long, the CD10 can be operated by one person.

The design of the Deron CD10 Coal Drill ensures easy repair and replacement of parts. The CD10 requires 15 GPM @ 1500 psi for operation and is compatible with most mining equipment hydraulic systems. The CD10 can also be operated on longwall systems using the appropriate pressure reducing hose kit. A pull-type control handle, integral relief valve, four (4) varieties of chucks, and replaceable motor are features which make the CD10 a dependable drill for underground work.

### FEATURES:

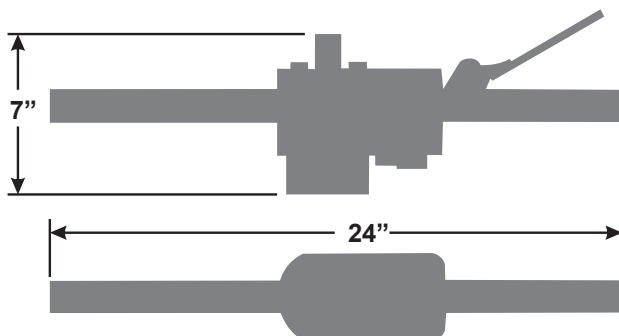

- One Piece Case
- Pull-Type Control Handle
- Integral Relief Valve
- Replaceable Motor
- Five (5) Torque and Speed Ratings

### SPECIFICATIONS:

- Oil Requirement: 15 GPM @ 1500 psi

### CHUCKS:

- 1-1/8" Hex
- 13/16" Hex
- 1-1/8" Square
- 1" Twist

Model	Torque-(Ft./Lb.)	RPM
CD10-100	40	885
CD10-200	60	748
CD10-300	75	537
CD10-400	110	320
CD10-500	115	276

Above specifications at 15 GPM @1500 PSI Continuous Operation. Higher torque attainable for intermittent operation.
